WHAT GOES DOWN THE DRAIN

And What Doesn't

LIQUIDS

If it's a non-toxic liquid, it can go down the drain. Milk, coffee without the coffee grounds, juice, beer, dish soap, vinegar, wine, and more can be put down the drain. Even semi-liquid things like apple sauce, yogurt, and pudding can all be safely flushed down the drain.

SOLIDS

Food waste such as cooked vegetables.

PROPER GARBAGE DISPOSAL OPERATION

DO:

- Run water before turning on disposal.
- Feed waste in gradually.
- Turn off as soon as waste is washed through.

DON'T:

- Run the disposal dry.
- Pour harsh chemicals down the drain.
- Put fibrous materials such as celery or onion skins.

NOT OK!!!!

GREASE

Grease is a byproduct of cooking from meat fats, lard, oils, shortening, butter, margarine, food scraps, baked goods, sauces, and dairy products. When washed down the sink, grease sticks to the insides of sewer pipes (both on your property and under the street). Over time, it can build up and block entire portions of your home's plumbing system. The results can be raw sewage overflowing into your home or the house next door, potential contact with disease-causing organisms, and an unpleasant and expensive repair.

SOLIDS

- Eggshells 
- Flour
- coffee grounds
- Potato peels 
- Onions tops and skins
- Medication
- "Flushable" wipes 
- Condoms
- Produce stickers
- Expandable food: uncooked pasta, uncooked bread dough, etc.
